**To Parents of Students of Christ the King School:**

Christ the King School is excited to announce our partnership with Associates in Pediatric Therapy (APT). We want to help make sure that each child has the tools he or she needs to be successful in school.

Associates in Pediatric Therapy (APT) is a therapeutic clinic practice providing services for children with special needs in Metro Louisville, Lexington, Erlanger, and Southern IN. APT was founded in October, 2007, by Renea Sageser in Shelbyville, Kentucky.

APT's strength is being *100% family focused*. We focus on the *whole family*, from the patient to each employee. We pride ourselves on the overall culture we have established and align it with our company's mission "Advancing Patients to their next Therapeutic level."

Our unique appeal is we offer multiple pediatric services to the patient and family in a team approach. We also strive to provide therapy in a variety of locations that are appealing to the patient and family. We love partnering with other pediatric facilities or schools.

We are excited to announce that APT will be offering a wide range of therapy services including speech, occupational, and physical therapy, for the 2017-2018 school year. APT will provide FREE Screenings, at Christ the King School. We will start screening the second week in September, for ALL children in preschool, kindergarten, first grade, third grade, and fifth grade. All children will be screened, unless parent signs, that they do not wish, to participate in the screening. The screenings will take place at Christ the King School. We believe that communication is the key and APT will work with all families to receive same day documentation of care to assure carryover can be completed at home or school by the parent or teacher.

Please feel free to contact us if you have any questions...

Sincerely,

Renea Sageser, CEO
