

Logging your child into his/her online services accounts

We have a GMail account set up for all students from Kindergarten and up. Depending on your child's grade, an account for one or more online services, such as Overdrive/Sora, IXL, and AR, have been set up. To access your child's login credentials from ParentsWeb (<https://logins2.renweb.com/logins/ParentsWeb-Login.aspx>) or the RenWeb Home app:

- 1) Go to Web Forms | Student Credentials; and
- 2) Click on the button corresponding to the student whose credentials you need

Here are a few service-specific notes:

- 1) Google services are the only ones that require the school email address as the username, and the full, eight-character password as shown in RenWeb.
- 2) For all nonGoogle services for which CKS creates accounts, drop the "AG" from the end of the GMail password, and use the non-Google username;
- 3) The first time a student logs into IXL on a particular device, you must append "@ctkschool" (without the quotes) to the end of the non-Google username. Upon successful login, you'll be prompted to save the custom login information, and once you do that, the "@ctkschool" suffix will automatically appear for subsequent logins, and you can use the non-Google username only thereafter;
- 4) On iPads, links to a Google Form (from Google Classroom, for instance) may prompt for a choice of browser. It's best to choose Safari, and then you'll need to log in with the child's school GMail credentials.

Here are some links to online services your child may need (note where logins were created by students, and thus may not match the info in ParentsWeb):

- 1) Google Classroom: <https://classroom.google.com>
- 2) GMail: <https://mail.google.com>
- 3) Accelerated Reader (AR):
<https://global-zone20.renaissance-go.com/welcomeportal/95852>
- 4) IXL: <https://www.ixl.com>
- 5) Overdrive/Sora: <https://www.overdrive.com/account/sign-in>
- 6) WordlyWise: <http://wordlywise3000.com> (student-created login credentials)
- 7) Pearson eText: <https://www.pearson.com/us/sign-in.html>
(student-created login credentials)

If your child has been issued a school device (iPad for elementary or Chromebook for middle school), connect the device to your home WiFi.

If you or your child has not set up access to RenWeb, follow the instructions in the appropriate document below. Note that the account creation process uses the primary email address currently set up in the target RenWeb record:

- Parent access: https://ctkschool.net/download_file/936/214
- Student access (K - 8th): https://ctkschool.net/download_file/935/214

Should you have any tech questions or encounter any technical difficulties during NTI days, please feel free to contact our IT Administrator, Mr. Mongiardo, at it@ckslex.org.
